About Thrifted Living

Where forgotten furniture finds new purpose.

Our Story

Thrifted Living started in 2018 in a cramped Brooklyn garage with one simple mission: save beautiful furniture from ending up in landfills. What began as a weekend hobby—rescuing worn chairs and

tired tables from estate sales—quickly became a passion.

We saw potential where others saw junk. A water-stained dresser became a statement piece. A wobbly mid-century chair was reborn with new upholstery and reinforced joints. Each piece we touched had decades of stories woven into its wood grain, and we wanted to help those stories continue.

Today, our small team of artisans, upholsterers, and furniture lovers has restored over 2,000 pieces. We've grown from that garage into a sunny Brooklyn showroom, but our mission remains the same: give every piece the second chance it deserves.

— Emma & James, Founders

The Transformation

See what's possible when craftsmanship meets character.

Our Refurbishing Process

Every piece goes through a careful, hands-on restoration journey.

1

Discovery

We source pieces from estate sales, auctions, and private sellers—always looking for quality bones and hidden potential.

2

Assessment

Each piece is carefully inspected. We document its condition, identify repairs needed, and plan the restoration approach.

3

Restoration

Our artisans get to work—repairing joints, refinishing surfaces, replacing springs, and reupholstering with quality fabrics.

4

Final Touch

Every piece is cleaned, polished, and inspected before heading to the showroom floor, ready for its next home.

What Drives Us

Sustainability

Every restored piece means one less in a landfill and reduced demand for new manufacturing.

Craftsmanship

We use time-honored techniques and quality materials to ensure each piece lasts another lifetime.

Character

Vintage pieces carry warmth and history that mass-produced furniture simply cannot replicate.

Thrifted Living

Curating vintage and refurbished furniture for homes that value character and sustainability.
